Interlock for the gas ballon valve

Security seal "Capseal"

Security seal "Capseal" is a new product that allows to protect the gas cylinder valve and prevent unauthorized selection of liquefied gas. Security seal Capsel is a unified onstruction with a locking device collet type.

Advantages of security seal Capsel:

- Specially designed for the sealing of gas cylinders;
- An internal locking mechanism is protected from direct access, which ensures the impossibility of opening the seal, without visible injury;
- Each seal has a unique, nonrecurring number;
- Numbering and logo printing on the body of the seal is made by a special technology, without the use of dyes;
- Excluding re-use and forgery of security seals;
- Convenience and easiness of installation;
- Manual installation without using special tools.
